

Environmental Policy

Dallcon's vision is to become a leader in promoting environmentally sustainable practices and products by supporting all stakeholders to achieve excellence in environmental practices and management during the manufacture and supply of a range of quality precast concrete products.

Dallcon is committed to protect the environment, prevent pollution and will continuously develop, maintain and improve our environmental management system and our environmental performance through:

- Continuously developing and improving our Environmental Management System to minimise impacts and prevent pollution;
- Providing adequate resources to ensure continuous improvement in our environmental capability through training, communication and the implementation of Environmental Improvement Programs;
- As a minimum, complying with all legislative, business, government requirements, codes and guidelines;
- Identifying environmental risks and impacts, as well as the necessary mitigation measures required to reduce or eliminate that risk;
- Identifying key environmental objectives and measuring our performance in achieving objectives and targets through the implementation of an environmental strategy;
- Monitoring, reviewing and reporting on environmental performance;
- Monitoring and reporting the sustainable use of resources including energy, water and waste to minimise the effects of climate change;
- Reducing unnecessary water usage and contamination;
- Consideration of impacts on biodiversity in our operation and;
- Annually review and revise this policy and communicate it to all interested parties.

The Health Safety and Environment Manager is responsible for implementation of the Environmental Management System and the behavioural change necessary to ensure the commitments made in this policy are being met.

Hilton Sprigg
